

Scality RING & Rubrik

Object Store Data Management for Instant Backup & Recovery

Today's digital economy is challenged to manage the exponential growth of data. Enterprises demand that data is always available no matter what disaster occurs. A policy-driven backup, instant recovery, replication, and archive solution that delivers simplicity, unlimited scale, data integrity, and speed is required to meet the critical needs of the digital business.

Scality and Rubrik have partnered to build an Enterprise Data Management Solution that exceeds your organization's automated Backup and Recovery expectations. By combining Rubrik's world-class unified data orchestration, catalog management, and deduplicated storage into a single scale-out fabric with Scality's award-winning RING software defined object storage, you get unlimited linear scale, 14x9's of durability and a lower TCO without being locked into proprietary hardware platforms.

Scality RING is Rubrik-certified, and designed to meet the largest and most demanding datacenter environments by delivering breakthrough capabilities for virtualized and physical systems that go well beyond what traditional backup practices can achieve. The integrated solution provides end-to-end data management from backup to replication to archival, preserves your data easily, allows you to instantly access data, and supports automated policies to lower the TCO. With support for private or public cloud, you can choose where you want the data stored. Using Scality RING to manage the data archive for Rubrik unlocks a level of scale, performance and durability at a TCO that tape- and NAS-based targets could only dream of. Integrated with Amazon AWS S3, Scality and Rubrik provide an ideal solution for your data, either on-premises or in your cloud.

What's In It for You?

Lower Costs Scality + Rubrik offer worry-free expansion while reducing TCO by up to 90%. You can now leverage standard servers seamlessly (and those supply agreements!) to reduce infrastructure and maintenance costs – and for rapid scaling to meet your backup and recovery infrastructure requirements. Automatic rebalancing and self-healing enables efficient and cost-effective capacity expansion and server replacement for better lifecycle management.

Faster Recovery Unlike conventional NAS or tape-based storage, Scality + Rubrik enables high density hard drive recovery instantly, not days, reducing backup windows and restore times. Eliminate tape management overhead (monitoring, job schedules, off-site access, time to restore, and data search), and enable complete parallelism & scale-out storage. Throughput scales linearly across mixed workloads without degrading the performance eliminating complex time-intensive data management.

Safer Data Enterprises demand data durability in the 14x9's with intuitive management. This combined solution meets those demands while increasing data recovery times significantly from traditional systems. Extreme fault tolerance with geo-distributed deployment and protection policies (replication or erasure coding) take protection to another level. Rubrik + Scality take advantage of the S3 protocol to enable security & access control.

Perfect Fit A safe, fast, affordable backup solution can place huge demands on digital businesses. With the combination of Rubrik and Scality, you get the same backup and recovery used in the world's largest and most complex heterogeneous environments. Mutual certification ensures you aren't chasing vendors when problems arise. Whatever the fit, we've got you covered.

About Rubrik

Rubrik has developed the world’s first Cloud Data Management platform for data protection, search, analytics, archival and copy data orchestration for hybrid cloud enterprises. Fortune 500 companies use Rubrik to manage data at scale while realizing data-driven services anytime, anywhere. Rubrik has been named to Gartner’s Cool Vendors in Storage Technologies, 2016. About Scality

Scality, world leader in object and cloud storage, develops cost-effective Software Defined Storage (SDS): the RING, which serves over 500 million end-users worldwide with over 800 billion objects in production; and the open-source S3 Server. Scality RING software deploys on any industry-standard x86 server, uniquely delivering performance, 100% availability and data durability, while integrating easily in the datacenter thanks to its native support for directory integration, traditional file applications and over 45 certified applications. Scality’s complete solutions excel at serving the specific storage needs of Global 2000 Enterprise, Media and Entertainment, Government and Cloud Provider customers while delivering up to 90% reduction in TCO versus legacy storage. A global company, Scality is headquartered in San Francisco.
