

Scality RING & Veeam

Availability for the Always-On Enterprises

Businesses just like yours are modernizing their data centers with virtualization, storage and cloud technologies to try to meet today's business needs and lower costs—but it's not working! They are struggling with data growth of 30%—50% per year and, despite massive investments, end users' expectations in terms of data and applications availability are simply not being met.

This opens a gap—an “Availability Gap”—between the requirements of the Always-On-Business and IT's ability to deliver on those requirements. What side of the Availability Gap are you on?

Scality and Veeam have partnered to build a joint High-Availability Solution for Enterprises that exceeds your organization's Backup and Recovery expectations. The solution combines Veeam's ground-breaking backup and recovery application software with Scality's

award-winning RING software-defined storage solution that facilitates unlimited linear scale, 14x9's of durability, 100% availability and a lower TCO without proprietary hardware platform lock-in.

Replace Legacy Backup Storage with Veeam on Scality to Maximize Availability

Veeam bridges the Availability Gap with a new kind of solution that offers Availability for the Always-On Enterprise that delivers recovery time and point objectives (RTPO™) of < 15 minutes for ALL applications and data. With Veeam, you'll get a solution that delivers: High-Speed Recovery, Data Loss Avoidance, Verified Recoverability, Leveraged Data, Complete Visibility.

Using Scality RING to manage the physical storage for Veeam delivers a level of availability, performance and scale at a TCO that tape and NAS-based targets could only dream of.

What's In It for You?

Lower Costs Scality + Veeam offer high-availability while reducing TCO by up to 90%. The Veeam Unlimited Scale-out Backup Repository leverages the Scality RING as a single backup repository for any data and application. You can increase backup storage capacity infinitely by simply adding standard servers to the Scality RING. By using standard servers (and those supply agreements!), you reduce training and maintenance costs – and allow for rapid scaling.

Higher Availability Leveraging combined features, Scality + Veeam guarantee the highest availability: Veeam High-Speed & Verified Recovery, allows your organization to achieve RTOs of <15 minutes! With Veeam SureBackup, you can automatically verify the recoverability of every backup. Scality's self-healing and fast hard drive recovery allows you to scale your infrastructure while always meeting your availability SLAs.

Safer Data Scality + Veeam ensure Data Loss Avoidance: Veeam Backup & Replication provides multiple backup options designed to meet your needs and ensure the fastest, most efficient backups possible. With the combined solution you can replicate either on site for high Availability or off site for disaster recovery. Scality also offers the option to protect your data with erasure coding (single site or multi-site) to increase your ROI.

Perfect Fit With Scality + Veeam, you can close the “Availability Gap” between the requirements of the Always-On Business and IT's ability to deliver on those requirements. Veeam's High-Availability Backup & Recovery solution has been tightly integrated with the Scality RING to enable the always-on enterprise. Mutual certification ensures you aren't chasing vendors when problems arise. Whatever the fit, we've got you covered.

About Veeam Veeam® recognizes the new challenges companies across the globe face in enabling the Always-On Enterprise™, 24.7.365. To address this, Veeam has pioneered a new market of Availability for the Always-On Enterprise™ by helping organizations meet recovery time and point objectives (RTPO™) of less than 15 minutes for all applications and data, through a fundamentally new kind of solution that delivers high-speed recovery, data loss avoidance, verified recoverability, leveraged data and complete visibility. Veeam Availability Suite™, which includes Veeam Backup & Replication™, leverages virtualization, storage, and cloud technologies that enable the modern data center to help organizations save time, mitigate risks, and dramatically reduce capital and operational costs.

About Scality Scality, world leader in object and cloud storage, develops cost-effective Software Defined Storage (SDS): the RING, which serves over 500 million end-users worldwide with over 800 billion objects in production; and the open-source S3 Server. Scality RING software deploys on any industry-standard x86 server, uniquely delivering performance, 100% availability and data durability, while integrating easily in the datacenter thanks to its native support for directory integration, traditional file applications and over 45 certified applications. Scality's complete solutions excel at serving the specific storage needs of Global 2000 Enterprise, Media and Entertainment, Government and Cloud Provider customers while delivering up to 90% reduction in TCO versus legacy storage. A global company, Scality is headquartered in San Francisco.
